Agile Key Exam Concepts

Mahendranath Jogi

Java Full-Stack Developer | Module Lead | Java 17/21 | Spring Boot | Angular | Microservices | Hazelcast | Python | SAFe Agile | Enterprise Software Development
Pune Division, Maharashtra, India

Summary

I am a results-driven Java Full-Stack Developer with 7+ years of experience in designing, developing, and delivering scalable enterprise applications, middleware solutions, and cloud-enabled platforms across banking, payments, and telecom domains. Experienced in building secure and maintainable applications using Java, Spring Boot, Angular, Microservices, REST APIs, Apache Camel, AWS, Docker, Kafka, and CI/CD practices. Currently working as a Module Lead at Mphasis, responsible for managing Java Full-Stack development activities for enterprise banking applications using Java (17/21), Angular (v18/20), Microservices, and Micro-Frontend architectures. Leading Agile delivery, collaborating with cross-functional teams, reviewing user stories, ensuring application quality, and supporting the development of scalable business solutions. Key areas of expertise include:

- Full-Stack Development: Java, Spring Boot, Angular, Microservices, REST API Development
- Enterprise Application Engineering: Middleware Solutions, Application Architecture, API Integration
- Cloud & DevOps: AWS, Docker, CI/CD Pipelines, Git, Cloud Application Deployment
- Quality & Delivery: JUnit, Integration Testing, SonarQube, Code Quality Management
- Agile Collaboration: SAFe Agile, User Story Analysis, Estimation, Technical Documentation

I have contributed to enterprise-grade software solutions by improving application performance, developing scalable backend services, implementing cloud-based solutions, and collaborating with business and technology teams to deliver reliable outcomes. Passionate about building efficient software solutions, exploring modern technologies, and contributing to teams that focus on innovation, quality, and continuous improvement.

Let's connect if you're looking for a dedicated professional who blends precision with passion.

Experience

Mphasis

Module Lead

April 2024 - Present (2 years 5 months)

- Managed Java Full-Stack development activities for enterprise banking applications using Java (17/21) and Angular (v18/20), supporting scalable and business-critical solutions.
- Coordinated Agile development delivery using SAFe practices, including user story reviews, estimation, validation, and alignment with business requirements
- Designed and implemented Microservices and Micro-Frontend architectures to improve application scalability, maintainability, and system integration.
- Enhanced application performance through Hazelcast caching and ensured code quality using JUnit, integration testing, mutation testing, and SonarQube analysis.
- Collaborated with cross-functional teams to deliver reliable software solutions while maintaining development standards and project objectives.

Tools & Technologies:

Version Control: GitHub, GitLab

Development Environments: Visual Studio Code, IntelliJ IDEA

Code Quality: SonarQube, SonarLint

Containerization: Docker

Messaging & Streaming: Apache ActiveMQ, IBM MQ, Apache Kafka

DataLake : Snowflake

Artifact Repository: Nexus

CI/CD Pipelines: GitLab

API Testing: Postman, Insomnia

Worldline Global Services

Consultant

October 2021 - April 2024 (2 years 7 months)

Pune District

- Developed middleware applications and microservices using Java (JDK 8/11), Spring Boot, and Apache Camel to support scalable enterprise solutions.

- Implemented cloud-based application solutions using AWS services, including EC2 and Lambda, to improve deployment and application performance.
- Built responsive applications using Angular 10 and Java while following SAFe Agile practices for iterative development and delivery.
- Created and managed REST APIs using Swagger and YAML, ensuring effective integration between application components.
- Performed unit testing with JUnit 5 and collaborated with teams to review user stories, estimate efforts, and align deliverables with business requirements.

Infosys

System Engineer

October 2018 - October 2021 (3 years 1 month)

Pune Division

- Developed backend solutions using Microservices, Spring Boot, Apache Camel, JPA, and AKS, supporting application enhancements and business-driven requirements.
- Created RESTful APIs for code migration and new functionality development, ensuring smooth application integration and improved system capabilities.
- Supported Agile development and CI/CD practices using tools such as Jenkins, GitLab, and GitHub to enable efficient software delivery.
- Prepared high-level design documents, technical mappings, and API specifications to support enterprise application design and stakeholder understanding.
- Performed code validation, user story reviews, effort estimations, and testing activities using tools including JUnit, Swagger, Postman, SQL Developer, and SonarQube.
- Managed Depot Setup activities by coordinating with TNT-FedEx and Infosys teams to support business expansion initiatives and operational growth.
- Coordinated with business and marketing stakeholders to establish new depot setups across locations, ensuring smooth implementation and business readiness.
- Handled change requests by collaborating with change management and application teams to deliver required solutions aligned with business needs.
- Analysed business requirements through requirement gathering and elicitation, supporting effective change management and successful project delivery

Tech Mahindra

advisor

June 2017 - July 2018 (1 year 2 months)

Ahmedabad, Gujarat, India

- Provided technical floor support, trained new employees, and resolved complex telecom-related issues while coordinating with internal teams for effective service delivery.
- Managed customer interactions, tracked service complaints, supported network issue resolution, and maintained coordination between customers, team leads, and managers

Education

P. D. Pandya Institute of Computer Application

BCA - Bachelor of Computer Application, Computer

Programming · (2015 - 2018)
