Mahendra Nath

Software Engineer
Pune Division, Maharashtra, India

Summary

Java Full-Stack Developer with 7+ years of experience in building scalable enterprise applications and middleware solutions. Currently leading a full-stack team at Mphasis to deliver enterprise-grade applications using Angular (v18/20) and Java (v17/21). Skilled in designing microservices and micro-frontends, implementing high-performance caching with Hazelcast, and ensuring code quality through JUnit, mutation testing, and SonarQube. Strong background in Agile (SAFe) practices, cloud deployment with AWS, and CI/CD automation. Experienced across multiple domains including banking, payments, and telecom, with a proven track record of driving technology transformation and team leadership.

Experience

Mphasis

Module Lead

April 2024 - Present (2 years 4 months)

- Leading a Java Full-Stack Development Team to build enterprise-grade applications using Angular (v18/20) and Java (v17/21) for a leading custodian bank.
- Driving iterative development by following the SAFe Agile methodology.
- Designing and implementing microservices and micro-frontends to create a highly decoupled and scalable application ecosystem.
- Leveraging Hazelcast caching for seamless, high-performance data transactions.
- Ensuring code quality and reliability through JUnit, integration testing, mutation testing, and SonarQube analysis & fixes.
- Reviewing and validating user stories, performing story point estimations, and providing cross-verification to ensure business alignment.

Tools & Technologies:

Version Control: GitHub, GitLab

Development Environments: Visual Studio Code, IntelliJ IDEA

Code Quality: SonarQube, SonarLint

Containerization: Docker

Messaging & Streaming: Apache ActiveMQ, IBM MQ, Apache Kafka

Artifact Repository: Nexus

CI/CD Pipelines: GitLab

API Testing: Postman, Insomnia

Worldline Global Services

Consultant

October 2021 - April 2024 (2 years 7 months)

Pune, Maharashtra, India

- Building Middleware Application and Microservices in JDK 8/11 using Spring Boot and Apache Camel.
- Following SAFe Agile methodology for Iterative Development.
- Used AWS Cloud Services like EC2, Lambda and etc.
- Created Application with Angular 10 and Java 8
- Writing Unit test with JUnit5.
- Planning and Creating Rest API using Swagger with YAML.
- Cross verifying User Stories and estimating Story point.
- Hands-on-tools and Technology:

Version Control : Github, Gitlab

Development : Eclipse, STS, VSC, IntelliJ

Code Quality : Sonar Quabe, Sonar Lint

Containerization : Docker

Queues and Streaming : Apache ActiveMQ, IBM queue, Apache Kafka

Repository : Nexus.

CI/CD Pipeline : Gitlab

API Test : Postman

Cloud : AWS

Infosys

System Engineer

October 2018 - October 2021 (3 years 1 month)

Pune, Maharashtra, India

Project : CSCS

Spring Boot Developer

- Working in Agile methodology where CI/CD being for continuous Deployment.
- Developing Back-End infra via Micro services as per the business requirement using AKS tools.

- Creating RESTful APIs for existing code migration and a whole new functionality.
- Experienced in YAML, Spring boot, Apache Camel, Micro services, JPA, JUnits.
- Used to with tools like Swagger , STS , Postman, SQL Developer, SONARQuabe, Jenkins, Gitlab, Github.
- Created High Level Design documents, Technical Mappings and API for Business understanding of Enterprise application Design
- Cross verifying User Stories and estimating Story point.

Project : Service Disruption

Spring Boot Developer

- Developing Back-End infra via Micro services as per the business requirement.
- Creating RESTful APIs a whole new functionality.
- Hands On experience in YAML, Spring boot, Apache Camel , Micro services, JPA, JUnits.
- Used to with tools like Swagger , STS , Postman, SQL Developer, SONAR.

Associate Business Analyst :

- Leading the Depot Setup team where I am helping and enabling client (TNT-FedEx) and Infosys to grow and enhance their business and producing the more billing to the company accounts.
